STEEL DOOR FRAMES

MORE POSSIBILITIES PROVIDED BY STEEL FRAMES

STEELDesign

STEEL DOOR FRAMES

Steel frames are an ideal solution for the most demanding customers. Thanks to their durability and unquestionable attractiveness, they may be used in many types of places.

MOISTURE-RESISTANT

Being made of zinc-coated sheet, with additional surface protection ensured by a passivation layer and a polyester powder paint layer, they are highly corrosion-resistant.

GREAT DURABILITY

They are made with great precision, as the materials used are carefully selected in order to guarantee not only the stability of the structure, but also the maintenance of quality over time.

INVISIBLE JOINT LINE

Because the joint line is invisible, at the same time it is very solid.

DIVERSIFIED CHROMATIC RANGE

Premium Polyester Paint
